

PROGRAM: Technology Transfer

AGENCY: Los Alamos National Laboratory, Phillips Laboratory, Sandia National Laboratory and University of New Mexico (UNM)

DESCRIPTION: Technology transfer is now a mission of all Department of Energy Laboratories. The labs and UNM have expressed their eagerness and ability to develop cooperative agreements with industry.

ELIGIBLE USES:

- Through mutually beneficial agreements, business owners may access:
 - Facilities,
 - Proprietary intellectual property through government waivers, licensing, and cooperative research and development agreements,
 - Joint and cooperative research and development,
 - Personnel exchanges,
 - Consulting agreements; individual and institutional,
 - Informal, short-term advice and problem solving,
 - On and off-site training seminars and colloquy, and
 - Participation with the extensive and active chapters of scientific engineering and professional associations.
